

Tech MBA

MBA In Technology Leadership

Get Schulich Grads Working For You

Introducing Canada's first MBA in Technology Leadership (Tech MBA) from the country's top business school. Through a constantly evolving curriculum, real-world experience, and a focus on experiential learning, the next generation of change makers will be ready to lead in an era where every company is a tech company.

A Full-Time MBA Program Built For Tech Leaders Of The Future.

- ✓ Students complete 4 terms designed specifically to prepare them for the age of technological disruption.
- ✓ 40% of the curriculum is focused on experiential learning and students are required to complete an internship in the technology industry or in a tech-enabled role.

Our Disruptive Approach

Ever-Evolving Curriculum

A fluid, cutting edge curriculum guided by the Schulich Tech MBA Advisory Council based on the tech developments driving the market today

Experiential Learning

Focus on experiential learning, with real-world assignments and case competitions, and mandatory full-time internships

Embedded in Toronto's Tech Scene

Access and exposure to the Toronto tech network—with executives in the classroom, partnerships with major tech industry leaders informing the curriculum

Why Be A Corporate Partner?

01

Tailored Talent

You will gain advanced access to a select group of top talent in the industry who have the skills and ambition to lead digital transformation, innovation and tech-led disruption at companies of all sizes.

02

Dynamic Interns

You will collaborate with a dynamic and diverse group of highly motivated students. Our students are eager to gain practical, hands-on experience and contribute valuable insights to your team.

03

Tech Leader Positioning

You will be recognized as a company committed to pushing the tech industry forward and will have a seat at the table shaping the way the tech leaders of the future are trained—cementing your company's position as a tech leader in Canada.

04

Employee Development

You will develop and elevate your employees as thought leaders through cutting-edge experience grounded in real-world challenges. Opportunities for employees to become speakers, case competition leaders, and more.

05

Support Future Leaders in Technology

Make an impact for aspiring tech leaders to pursue their dreams through a named scholarship or award. Your support will do much more than reward excellence. It will ease financial stresses, celebrate diversity, inclusion, and equity, and provide accessibility to talented candidates who experience barriers to success.

What To Expect From Our Students

Leading Through Change

Honed leadership skills, teamwork skills and knowledge of management in the context of technology and digital transformation initiatives

Evaluating Decisions

Able to identify and analyze management problems for tech initiatives using ambiguous data—and evaluate approaches business decisions in the global context

Holistic Solutions

Able to derive innovative, sustainable solutions for tech challenges; while addressing ethical, social, DEI, and environmental issues
