THE SCHULICH MBA IS CONSISTENTLY RANKED AMONG THE WORLD'S TOP BUSINESS SCHOOLS

#3 IN THE WORLD in the field of responsible business among large MBA programs *(Corporate Knights)*
TOP 100 IN THE WORLD for Career Outcomes *(LinkedIn & QS)*
TOP 30 MOST POPULAR MBA PROGRAM in the World *(mba.com)*
TOP 30 IN THE WORLD for careers in Finance, Technology & Information Management *(QS TopMBA)*

Ranking results as of April 2026

A Message from the Director, Centre for Career Design

> I am proud to present the career achievements of the Schulich MBA Class of 2025. This report celebrates our graduates' determination, the breadth of their talents and the diverse paths they are pursuing. Among those actively seeking employment, 91% received an offer within six months of graduation—a reflection of their sustained efforts and ability to demonstrate their value to employers.

Our graduates secured roles across financial services, consulting, technology, consumer packaged goods, government, manufacturing and other industries. This diversity reflects the versatility of a Schulich MBA and the individual interests, experiences and aspirations that shape each student's career journey.

Employers consistently recognize Schulich MBA talent for strong analytical thinking, sound judgment and adaptability. They describe individuals who ask thoughtful questions, collaborate effectively and take ownership of their work. Their feedback highlights an ability to connect business knowledge with practical solutions, contribute to unfamiliar environments and continue learning as responsibilities grow.

Experiential education helps students build and demonstrate these capabilities throughout their program. Every MBA student has opportunities to apply classroom learning to real business challenges, including an eight-month consulting project with a real company. Options for credit-based work placements provide additional opportunities to gain workplace experience, explore career interests and strengthen professional relationships. These experiences help students test their assumptions, navigate complexity and develop confidence in their contributions.

At the Centre for Career Design, we support this growth through an approach rooted in the NACE Competencies for a Career-Ready Workforce framework. Its eight competencies—career and self-development, communication, critical thinking, equity and inclusion, leadership, professionalism, teamwork and technology—help students articulate how their learning and experience translate into workplace contributions. Our values of integrity, service, expertise, empathy and enthusiasm guide how we support each student's goals.

I am grateful to our employers, alumni, faculty and colleagues for the opportunities and guidance they provide, and to the CCD team for their dedication. Their collective support helps students turn learning into experience and professional connections into career possibilities.

To the MBA Class of 2025: congratulations. You bring diverse perspectives, valuable experience and the capacity to make thoughtful contributions across organizations and communities. As your careers unfold, remain curious, build relationships generously and lead with integrity. We look forward to celebrating the many ways you will put your Schulich education into practice.

Minerva Cernea (She/Her)
Director, Centre for Career Design

Alumni Reflections

Ayush Singh
(MBA '24)

Senior Policy Advisor, Ministry of Economic Development, Job Creation and Trade (MEDJCT), Ontario Public Service

How did the Schulich MBA program align with your career goals and personal aspirations?

The Schulich MBA aligned closely with my professional ambitions and personal commitment to public service. As a Senior Policy Advisor within the Ontario Public Service, I wanted to broaden my leadership perspective and strengthen my understanding of business, economics and organizational strategy. Schulich enhanced my ability to assess complex challenges through multiple lenses, including financial analysis, risk assessment and strategic management. The program also strengthened my leadership, stakeholder engagement and collaborative problem-solving skills, which are essential when supporting senior decision-makers. Personally, pursuing the MBA pushed me beyond my comfort zone, expanded my professional network and reinforced my commitment to lifelong learning. Ultimately, it has strengthened my ability to contribute effectively to public policy and organizational leadership.

How did the Professional Development course (if you had it as an elective), CCD or broader Schulich network help you navigate a particular challenge or opportunity during the program or your job search?

The Career Development Centre (CCD) and broader Schulich network helped me communicate my professional experience more strategically, focusing on outcomes, stakeholder influence and organizational impact rather than simply describing policy responsibilities. Through workshops, coaching sessions, networking events and conversations with classmates and alumni, I gained valuable insights into leadership and problem-solving across different industries. Connecting with professionals in consulting, finance, technology and healthcare broadened my perspective on organizational transformation, change management and strategic execution. These conversations also helped me identify approaches that could be applied to complex public sector challenges. Perhaps most importantly, the relationships I developed became a trusted source of advice on career decisions, leadership challenges and emerging policy issues. The experience reinforced the value of learning from diverse perspectives and building relationships that continue to support professional growth.

Which professional competency developed during the program do you feel is most integral to your work today, and why?

Strategic thinking has been the most valuable competency developed during my Schulich MBA. As a Senior Policy Advisor, I regularly assess complex issues involving competing priorities, stakeholder interests, risks and long-term implications. The program strengthened my ability to view challenges from a broader perspective and understand how individual decisions affect wider government objectives. It also deepened my understanding of how organizations allocate resources, manage risk and execute strategic priorities. These skills are particularly important when advising senior executives who must make decisions amid uncertainty and incomplete information. By synthesizing complex information and considering economic, fiscal and operational factors, I can develop practical, evidence-based recommendations. Strategic thinking enables me to anticipate potential consequences, evaluate policy options more effectively and provide balanced advice that aligns with broader government priorities and organizational capacity.

How do you see the value of your Schulich degree evolving over time?

I see my Schulich MBA as a long-term investment that will continue to shape my leadership and decision-making throughout my career. As public policy challenges become increasingly complex, the degree provides a strong foundation for understanding the connections between government, business and society. Its emphasis on strategic thinking, organizational leadership and adaptability will become even more valuable as I take on greater responsibilities and roles. The Schulich alumni network also offers access to diverse perspectives that can help address organizational and policy challenges. Equally important, the degree complements my professional experience by demonstrating a commitment to continuous learning and growth. As technology, economic conditions and public expectations evolve, the knowledge, relationships and leadership capabilities gained at Schulich will help me contribute effectively to the Ontario Public Service.

What advice would you give to students who are considering Schulich for their MBA program?

My advice to prospective Schulich MBA students is to invest as much effort in building relationships as they do in their coursework. While the curriculum provides a strong foundation in strategy, finance, leadership and organizational management, some of the most valuable learning comes from classmates with diverse professional backgrounds. Collaborating with people from different industries and sectors challenges assumptions, broadens perspectives and develops more effective problem-solving skills. Schulich creates opportunities to learn through group projects, classroom discussions, guest speakers, networking events and interactions with professors and alumni. I particularly valued working with new teams each term, which strengthened my communication skills. Take advantage of these experiences and remain open to different approaches. The knowledge gained through the curriculum is important, but the relationships will continue to create value long after graduation.

Joanne Estephan (MBA '25)

Senior Finance Analyst, Away From Home Business Unit, PepsiCo Foods Canada

How did the Schulich MBA program align with your career goals and personal aspirations?

When I moved to Canada, I wanted to pivot into finance or strategy. Schulich's broad curriculum gave me room to explore both before choosing finance. Learning alongside classmates from around the world broadened my perspective and made starting over in a new country feel less daunting.

How did the Professional Development course, CCD or broader Schulich network help you navigate a particular challenge or opportunity during the program or your job search?

The Professional Development course, together with CCD events, helped me understand what a career in Canada could look like. Hearing professionals talk candidly about setbacks and turning points gave me realistic expectations for my search. I learned to build genuine connections and present my experience more confidently in interviews.

Which professional competency developed during the program do you feel is most integral to your work today, and why?

In my finance role at PepsiCo, I use storytelling to make analysis useful. I've learned to explain what's driving the numbers and tailor the message to what a colleague, manager or senior leader needs to make a decision.

How do you see the value of your Schulich degree evolving over time?

Schulich helped me establish myself professionally in Canada. As my responsibilities grow, I'll draw on what I learned about connecting financial analysis to business priorities and making decisions amid uncertainty.

What advice would you give to students who are considering Schulich for their MBA program?

Use the breadth of the MBA to test your interests, and get involved with CCD early. Career fairs, panels and events at employers' offices helped me understand where I could take my career.

Ezekiel F. Nunoo-Dadzie (MBA '25)

Assistant Vice President, Internal Audit, Citi

How did the Schulich MBA program align with your career goals and personal aspirations?

Coming to Schulich, I wanted to build on my experience in banking and Internal Audit while growing into a more effective leader. The leadership courses challenged me to look beyond technical knowledge and develop my communication, collaboration, and decision-making skills. Serving as Financial Director of the Graduate Business Council gave me an opportunity to put these skills into practice, shaping how I work with people and lead at Citi today.

How did the Professional Development course (if you had it as an elective), CCD or broader Schulich network help you navigate a particular challenge or opportunity during the program or your job search?

Moving from Ghana to Canada meant adapting to a new job market and learning how to present my experience in a different professional environment. Schulich's interview preparation and networking opportunities made a real difference. They helped me communicate my strengths more confidently, recognize the value of my international experience, and approach the job search with greater clarity. This support contributed to my transition into my current role at Citi.

Ezekiel F. Nunoo-Dadzie (MBA '25), continued

Which professional competency developed during the program do you feel is most integral to your work today, and why?

I would say strategic thinking. My background gave me a strong technical foundation in Internal Audit, but Schulich helped me see the bigger picture and connect individual risks to wider business objectives. In my role as AVP Internal Audit ERM at Citi, this perspective is particularly valuable when leading enterprise-wide audits, challenging risk management practices, and helping drive regulatory issues through validation and closure.

How do you see the value of your Schulich degree evolving over time?

For me, the value of the Schulich MBA goes beyond the qualification itself. It has helped me navigate a new country professionally, build confidence, and develop a broader perspective on business and leadership. As I progress in my career, I see myself drawing even more on these experiences to lead teams, influence strategic decisions, and contribute to the financial services industry in increasingly meaningful ways.

What advice would you give to students who are considering Schulich for their MBA program?

My advice is to make the most of everything Schulich offers, not just the classroom experience. Invest in relationships, participate in leadership opportunities, and take interview preparation and networking seriously. As someone who moved to Canada and had to navigate a new job market, I learned how important it is to communicate the value of your previous experience. Be open to growth, step outside your comfort zone, and trust what you bring to the table.

Rishabh Malik (MBA '24)

Analyst, Enterprise Compliance, Healthcare of Ontario Pension Plan (HOOPP)

How did the Schulich MBA program align with your career goals and personal aspirations?

I came to Schulich with a clear goal: to build a rewarding career in Canada and start from a strong position. I had worked in inspection and revenue at the Employees' State Insurance Corporation, a Government of India body, and wanted to take that experience into a new market. Schulich gave me the skills that switch required and, just as importantly, the platform to make it happen. Today I work at HOOPP, one of Canada's largest pension plans, which is the start I was aiming for.

How did the Professional Development course (if you had it as an elective), CCD or broader Schulich network help you navigate a particular challenge or opportunity during the program or your job search?

I took the Professional Development course, and it was really valuable. Professor Minerva Cernea prepared us for the job market by teaching the fundamentals that are critical to success yet easy to overlook. The CCD's resume reviews sharpened my application, and the networking events and alumni conversations connected me with people already in the industry. When you move countries, the hardest part is learning how things actually work and what employers expect. Schulich helped me close those gaps.

Which professional competency developed during the program do you feel is most integral to your work today, and why?

Adaptability. Schulich taught me to work through unfamiliar environments, set priorities and get things done, and the leadership skills I built go hand in hand with that. In compliance, I interpret regulatory requirements, turn them into practical policies and explain them clearly to senior stakeholders. Regulations and technology are ever-changing, and the ability to adapt quickly while still delivering consistently is what I rely on every day.

How do you see the value of your Schulich degree evolving over time?

I think its value grows over time. The degree sets the bar high from the start, but what lasts is what you learn, the connections you build and the mindset for handling unfamiliar situations. The Schulich name also carries weight. Most people in the industry know it, and hearing that you studied there makes a strong first impression. The network keeps working for you long after graduation.

What advice would you give to students who are considering Schulich for their MBA program?

Choose a school that gives you real learning, career support and networking in one place. Schulich does all three. It is well established, with a very large alumni community to learn from and connect with. The faculty is excellent, and the course structure leaves you well prepared for the workplace.

What Our Employers Are Saying

Deloitte.

Karina Esmail

Senior Consultant I GPSS
Deloitte Canada

"Schulich students are invited to participate in Deloitte Distinction, a networking and mentorship program designed to connect top MBA talent with Deloitte leaders and provide participants with meaningful exposure to consulting careers. Through Distinction and our broader relationship with Schulich, we have had the opportunity to engage with many exceptional students who have gone on to build successful careers within our organization.

What consistently distinguishes Schulich MBA students is their ability to combine strong analytical thinking with sound judgment, curiosity, and a highly collaborative mindset. They approach complex business challenges with a practical lens, ask thoughtful questions, and demonstrate a willingness to learn quickly in unfamiliar environments. Beyond technical and strategic capabilities, they bring a level of professionalism, resilience, and stakeholder awareness that enables them to contribute effectively from the outset and grow into leadership roles over time.

Our partnership with the Schulich Centre for Career Design has been instrumental to our success. The CCD team is organized, proactive, and deeply invested in fostering meaningful connections between employers and students. Their collaborative approach allows us to engage with candidates in a thoughtful way and create experiences that go far beyond traditional recruitment activities. The impact of Schulich talent at Deloitte has been significant. Many participants in the Distinction program have subsequently joined Deloitte through internships and full-time opportunities, where they have progressed into influential roles across the organization. This pipeline aligns closely with our talent strategy of identifying high-potential individuals early, investing in their development, and building future leaders who can help our clients navigate increasingly complex business challenges."

Panasonic

Dimitris Lenis

General Manager,
Integrated Solutions Division
Panasonic Canada

"I have been hiring Schulich MBA students and interns into my division for the past ten years. In that time it has become one of the most reliable talent channels we have, and the reason is consistency. Cohort after cohort, the students arrive ready to contribute rather than ready to observe. Schulich is one of the few schools in which students come with significant work experience.

What stands out is judgment. They adapt quickly to a fast-moving commercial environment, ask sharp questions early, and move comfortably between technical detail and business context. Our business sits at the intersection of hardware, software, and enterprise customer relationships, and that combination is genuinely hard to find. We give interns real work with real stakes, and they deliver.

The CCD team is a large part of why this works. They take time to understand what a role actually requires before proposing candidates, and they follow through. It is a partnership rather than a transactional pipeline, and that distinction matters when you are building a talent bench rather than filling a seat."

PACIFIC SMOKE INTERNATIONAL

Denny Liu

Director of Human Resources,
Pacific Smoke International

"Pacific Smoke International has had an excellent experience hiring Schulich MBA students, particularly for Sales, Finance, and Marketing roles. They consistently demonstrate strong business acumen, adaptability, and a willingness to take ownership. Their practical, solutions-oriented mindset, combined with strong analytical and collaborative skills, enables them to make meaningful contributions in our fast-paced, entrepreneurial environment. Working with the Schulich Career Development Centre (CCD) has also been a great experience—the team is professional, responsive, and committed to connecting us with high-quality talent. We value our partnership with Schulich and look forward to continuing to hire outstanding MBA graduates as our organization grows."
