THE SCHULICH MBA IS CONSISTENTLY RANKED AMONG THE WORLD'S TOP BUSINESS SCHOOLS

#3 IN THE WORLD in the field of responsible business among large MBA programs *(Corporate Knights)*
TOP 100 IN THE WORLD for Career Outcomes *(LinkedIn & QS)*
TOP 30 MOST POPULAR MBA PROGRAM in the World *(mba.com)*
TOP 30 IN THE WORLD for careers in Finance, Technology & Information Management *(QS TopMBA)*

Ranking results as of April 2026

A Message from the Director, Centre for Career Design

> The transition from university to professional life takes ambition, adaptability, and a willingness to explore. The Schulich i/BBA Class of 2025 brought these qualities to their next chapter, and I am pleased to share this report celebrating their accomplishments.

Within nine months of graduation, 88% of graduates actively seeking employment had secured jobs. Their achievements reflect the breadth of a Schulich education and the diverse interests and aspirations of our students. Other graduates pursued entrepreneurship, international experiences, or further education, including Schulich's one-year specialized master's programs.

Our i/BBA graduates secured roles across a wide range of sectors, including consulting, financial services, consumer goods, and technology, among many others. This diversity reflects the versatility of their skills and the confidence employers place in Schulich talent.

Our graduates enter the workforce with a strong business foundation, practical experience, and the ability to contribute across industries and functions. Through academic learning, experiential education, and professional development, they build the judgment, communication skills, and confidence needed to navigate an evolving workplace.

These outcomes also reflect the strength of the Schulich community. We are grateful to our corporate partners for creating opportunities and sharing their perspectives, and to our alumni for offering guidance, opening doors, and supporting the next generation. Their engagement helps students make informed decisions and build relationships that extend well beyond their first role.

At the Centre for Career Design, we support students in understanding their strengths, articulating their value, and pursuing careers aligned with their goals. Guided by integrity, service, expertise, empathy, and enthusiasm, our team connects students with career advice, learning experiences, and employers seeking emerging talent.

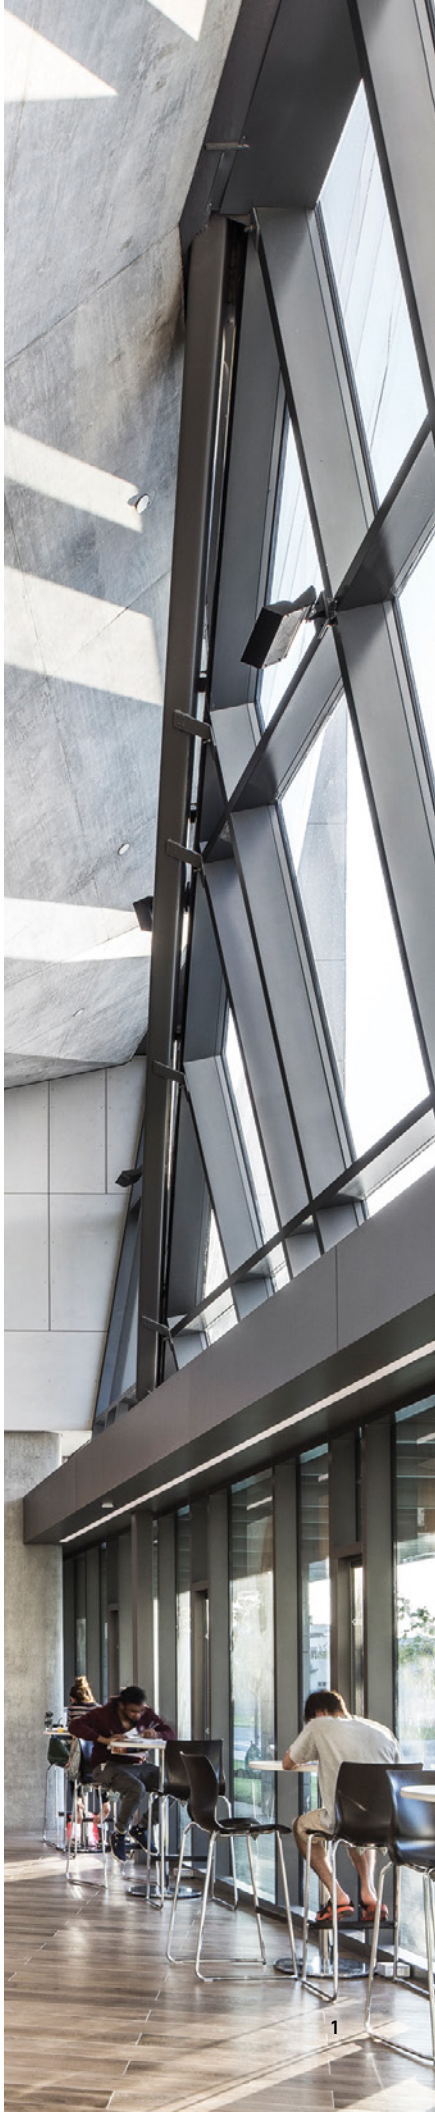

On behalf of the Centre for Career Design, I congratulate the i/BBA Class of 2025. We are proud of what you have achieved and look forward to the contributions you will make to your organizations, communities, and the wider world.

Minerva Cernea (She/Her)
Director, Centre for Career Design
Schulich School of Business

Note: In accordance with Career Services & Employer Alliance (CSEA) guidelines, salaries are not published for functions with fewer than 3 data points.

Alumni Reflections

Ali Munawar
(BBA '25)

Business Analyst,
Reliance Home Comfort

How did the Schulich undergraduate program align with your career goals and personal aspirations?

When I started at Schulich, I wasn't entirely sure what career I wanted to pursue, but I knew I wanted to explore business and build a strong foundation. Through the program's diverse learning experiences and career pathways, I discovered a passion for consulting. My experience at RSM in CFO Advisory helped me understand the types of challenges I enjoyed tackling. I realized I was drawn to roles that allowed me to explore different functions, solve varied business problems, and continuously learn. This ultimately led me from RSM to Reliance Home Comfort's Leadership Development Program, where I have thoroughly enjoyed gaining exposure to different areas of the business.

How did the CCD or broader Schulich network help you navigate a particular challenge or opportunity during the program or your job search?

The Schulich community was instrumental in my development and success. Through mentors in the Schulich Consulting Club, I learned how to prepare for interviews through mock interviews, build a strong resume, and communicate my experiences effectively. Beyond practical job-search skills, these relationships helped me develop my professional brand and better understand how to present my strengths and aspirations. Having people willing to share their experiences and provide guidance made navigating the early stages of my career much more manageable.

Which professional competency developed during the program do you feel is most integral to your work today, and why?

Adaptability and the ability to learn quickly have been the most valuable competencies in my career. Moving between different business environments and tackling unfamiliar problems taught me to approach new situations with curiosity and an open mind. In my current role at Reliance, these skills are particularly important because the Leadership Development Program exposes me to different functions, teams, and challenges. Being willing to learn, ask questions, and adjust my approach helps me contribute effectively while continuing to grow.

How do you see the value of your Schulich undergraduate degree evolving over time?

I increasingly appreciate that Schulich gave me more than a foundation in business concepts. It helped me develop the ability to think broadly, approach problems from different perspectives, and work across disciplines. Rather than preparing me for one narrowly defined career path, the degree equipped me with skills I can carry into different roles and industries. As my career develops, I expect this versatility to become even more valuable.

What advice would you give to high school students who are considering Schulich for their undergraduate studies?

Schulich is what you make of it. Take advantage of internships, clubs, networking opportunities, and the relationships you build along the way. Be open to exploring interests you may not have considered before, because discovering what you enjoy often requires trying something new. Once you find something you are passionate about, pursue it wholeheartedly. The opportunities are there, but your willingness to engage with them is what makes the experience meaningful.

Diya Sharma
(BBA '25)

Wealth Credit Structuring Analyst, Private Banking, Scotiabank

How did the Schulich undergraduate program align with your career goals and personal aspirations?

The Schulich undergraduate program aligned with my career goals through its emphasis on providing students with opportunities to explore different areas of business, both inside and outside the classroom. Building a foundation across finance, accounting, strategy, and marketing gave me a more holistic understanding of how different parts of a business connect and collectively influence decision-making. Beyond academics, the range of extracurricular, leadership, and professional opportunities available at Schulich allowed me to apply that perspective in different settings and continue developing my interests. That breadth became especially valuable as I pursued experiences across Capital Markets, Venture Capital, and Wealth Management, giving me a strong foundation to approach each opportunity with a broader understanding of business.

How did the CCD or broader Schulich network help you navigate a particular challenge or opportunity during the program or your job search?

One of the most valuable aspects of the CCD and broader Schulich network was having access to guidance at a stage when navigating career opportunities can feel unfamiliar. From learning how to approach the recruitment process to gaining exposure to different career paths, having a network of professionals, alumni, and peers made that process much more approachable. The ability to learn from people with different experiences helped me ask better questions, evaluate opportunities more thoughtfully, and become more intentional about the direction I wanted to pursue. More broadly, it reinforced the value of seeking different perspectives when navigating career decisions, something that continues to shape how I approach new opportunities today.

Which professional competency developed during the program do you feel is most integral to your work today, and why?

The professional competency I value most today is critical thinking. Schulich encouraged me to look beyond the immediate problem, consider different perspectives, and understand the broader implications of a decision. That mindset has become increasingly important in my work, where there is rarely a single factor driving an outcome. Being able to assess information, connect different considerations, and form a well-reasoned perspective has become an integral part of how I approach decisions and solve problems.

How do you see the value of your Schulich undergraduate degree evolving over time?

I see the value of my Schulich undergraduate degree continuing to evolve as my career progresses. While the knowledge and experiences gained during the program provided a strong foundation early in my career, I believe its long-term value lies in the community and perspective built around it. As classmates and alumni continue to grow across industries, roles, and geographies, that network becomes an increasingly valuable source of relationships, perspectives, and opportunities that extends well beyond graduation.

What advice would you give to high school students who are considering Schulich for their undergraduate studies?

My advice would be to stay curious and avoid putting pressure on yourself to have your entire career mapped out before starting university. University is an amazing opportunity to broaden your perspective and discover what genuinely interests you. Seek out a range of experiences, get involved beyond the classroom, and learn from people with different perspectives. The more willing you are to explore and step outside your comfort zone, the more you will learn about both business and yourself.

Paola Lipo
(BBA '25)

Associate Brand Manager — Meals & Baking (Betty Crocker & Pillsbury, General Mills

How did the Schulich undergraduate program align with your career goals and personal aspirations?

Schulich gave me the opportunity to explore different areas of business and ultimately discover my passion for the consumer packaged goods (CPG) industry. Through its industry-connected professors, experiential learning opportunities, and emphasis on strategic thinking, I developed the foundation and confidence to pursue a career working with some of Canada's most recognized consumer brands.

How did the CCD or broader Schulich network help you navigate a particular challenge or opportunity during the program or your job search?

One of the most valuable parts of my Schulich experience was learning from professors with firsthand experience in the CPG industry, who not only introduced me to the field but also supported me through case preparation and interviews. I also took advantage of networking mixers hosted by the CCD, where I connected with industry professionals, gained insight into different career paths, and built the confidence to pursue internships and full-time opportunities at Unilever and General Mills.

Which professional competency developed during the program do you feel is most integral to your work today, and why?

One of the most valuable skills I developed at Schulich was the ability to combine analytical thinking with creativity to solve business challenges. This became especially important during my time as an Associate Brand Manager at General Mills, where I leveraged consumer insights and market trends to help shape brand strategies for household names like Pillsbury and Betty Crocker.

How do you see the value of your Schulich undergraduate degree evolving over time?

As I continue growing my career in the CPG industry, I see the value of my Schulich degree extending far beyond the knowledge I gained in the classroom. The relationships I built, perspectives I gained, and adaptability I developed continue to influence how I approach new challenges and opportunities in an industry that is constantly evolving.

What advice would you give to high school students who are considering Schulich for their undergraduate studies?

My biggest advice is to stay curious, get involved, and take advantage of every opportunity to explore different industries, even if you don't have your career figured out yet. I entered university without knowing exactly where I wanted to end up, but by connecting with professors, attending networking events, and stepping outside my comfort zone at mixers and panels, I discovered a passion for CPG that has shaped my career ever since.

What Our Employers Are Saying

"At Restaurant Brands International (RBI) we have consistently hired Schulich students and graduates into our Leadership Development Program and Internships, where we give early-career talent the opportunity to take on meaningful responsibility, solve real business challenges and learn directly from experienced leaders through hands-on internship project experiences and cross-functional rotations. This reflects one of our values that we hold closely, ownership. Trusting our people to own their work from day one.

We have found that Schulich students bring a strong combination of business fundamentals, analytical thinking and leadership potential. They are curious and adaptable, communicate with confidence and collaborate effectively across teams. They are also comfortable working through ambiguity and prepared to take ownership early in their careers. These qualities allow them to contribute from the outset and make the most of the accelerated development our programs provide.

Our longstanding relationship with Schulich, including our participation in the i/BBA Recruitment Fair, has consistently connected us with talented students who are eager to learn, grow and make an impact. We value Schulich as a trusted recruitment partner and an important source of emerging talent for RBI."

James Cheeseman
Director, Global Campus Programs, Restaurant Brands International Inc.

"Working with the Schulich School of Business has been a truly rewarding experience for TELUS. From day one, the students arrived prepared, eager, and armed with thoughtful questions, ready to dive into real world projects. What sets Schulich's talent apart is a unique blend of analytical rigor and an entrepreneurial mindset."

Manisha Owan
P&C Advisor, Early Talent Strategy, Talent Acquisition, TELUS I Canada

TELUS

"The Schulich School of Business continues to provide an exceptional platform for student success while fostering a strong partnership with Enterprise Mobility in the development of early talent. Schulich students consistently enter the workforce well-prepared, motivated, and equipped to navigate today's evolving business challenges.

The Centre for Career Design (CCD) has been a valued strategic partner to Enterprise Mobility, helping to create a collaborative and sustainable talent pipeline that supports student and organizational success. Through their approachable, dedicated, and student-focused approach, the CCD team has consistently demonstrated a commitment to strengthening connections between students and employers.

Whether through industry-specific career fairs, coffee chats, office hours, or networking events, the CCD has delivered flexible, innovative, and highly engaging opportunities that our team greatly values.

Looking ahead, we are excited to continue our partnership with the CCD team and explore new initiatives that enhance student engagement and career development. Their creativity, collaboration, and forward-thinking approach make them an outstanding partner."

Bobby Gertsakis
